

**Customer feedback on the SugarMaple Sidewinder headphone amplifier,
March, 2016**

“Just a quick word to tell you how much I enjoy the Sugarmaple Sidewinder. I purchased some quality tubes & the overall sound is absolutely astounding. The Sidewinder makes my HD600 sound like nothing I've heard coming out of them before. This amplifier is a work of musical art. I've owned and sold much more expensive headphone amps (e.g. Headamp GS-X mkII, Auralic Taurus mk2, Headamp GS-1). With the proper tubes the Sidewinder is by far the best of the lot, to my taste anyway.

Just thought I'd let you know that I appreciate the craftsmanship of your company, which has enriched my musical experience. It has also made my retirement more enjoyable”.
